

## Logik-Elemente

### Typ AND42, OR42, YES, NOT-S, MV32

AND42, OR42

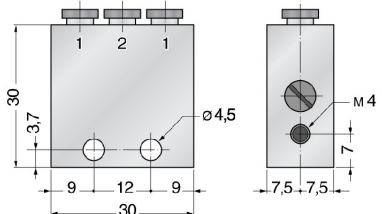

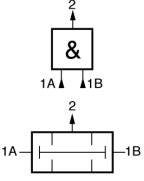

MV32

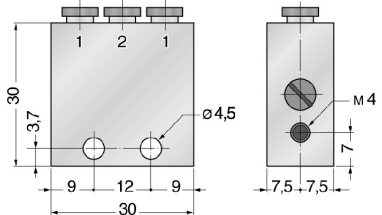

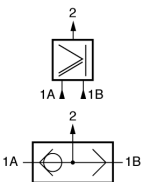

YES, NOT-S

|              |                                                                                                    |
|--------------|----------------------------------------------------------------------------------------------------|
| Anschluss    | 4 mm push-in<br>MV32: G1/8" ... G1/4"                                                              |
| Druckbereich | 2...10bar                                                                                          |
| Durchfluss   | 95 NI/min<br>MV32: 500 NI/min bzw. 1100 NI/min                                                     |
| Medium       | gefilterte und geölte oder ungeölte Druckluft                                                      |
| Hinweis      | CAD-Dateien sind im STASTO Store unter <a href="http://www.stasto.eu">www.stasto.eu</a> erhältlich |

#### AND42 UND-Element

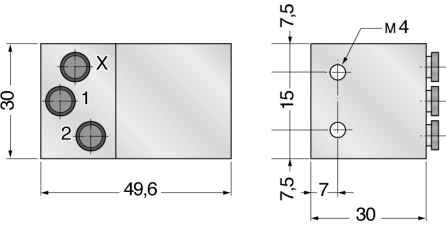

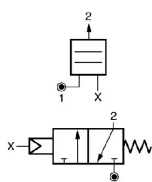

|                                                                                     | Funktion                                                                            | Typ   |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------|
|  |  | AND42 |

#### OR42 ODER-Element

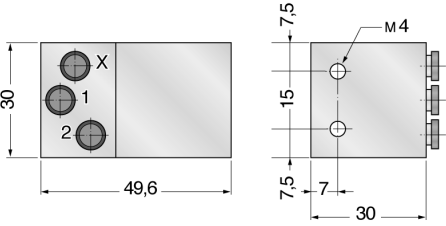

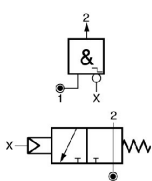

|                                                                                     | Funktion                                                                            | Typ  |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|------|
|  |  | OR42 |

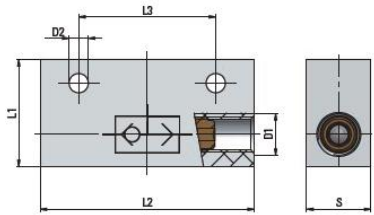

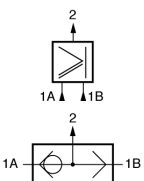

YES YES-Element

|                                                                                   | Funktion                                                                          | Typ |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-----|
|  |  | YES |

NOT-S NOT-Element

|                                                                                   | Funktion                                                                          | Typ   |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-------|
|  |  | NOT-S |

MV32 ODER-Element

|                                                                                    | Funktion                                                                           |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
|  |  |

| Anschluss D1 | D2  | L1 | L2 | L3 | S  | Durchfluss [Nl/min] | Typ        |
