

profile magnetic cylinder with piston rod brake series RWS and RWD

design	profile magnetic cylinder with double or rather single acting piston rod brake
heads	aluminum alloy
piston-rod	steel chromium plated
tie-rod	stainless steel X10CrNiS 1809
cylinder tube	aluminum profile hard anodized
seals	NBR
cushion	pneumatically, adjustable
ambient temperature	-10°C...+80°C
medium temperature	0°C...+40°C
lubrication	not necessary
medium	filtered compressed air
maximum operating pressure	2...10bar
max. braking pressure AA	7bar
information	CAD files are available on the STASTO Store under www.stasto.eu

type code

RW _	-- / ---
D double acting brake	32 ø32 stroke [mm]
S single acting brake	40 ø40
	50 ø50
	63 ø63
	80 ø80
	100 ø100

standard strokes, cushion length

	100	500 daN						RWS 100/...
minimum pressure for brake releasing: 4 bar (BB)								

the indicated permissible longitudinal force (kg.) on the piston rod is valid under the condition of a plentiful lubrication. with minimal lubrication, the amount of permissible longitudinal force is increased by 10%.
