Partnership. With Guarantee.

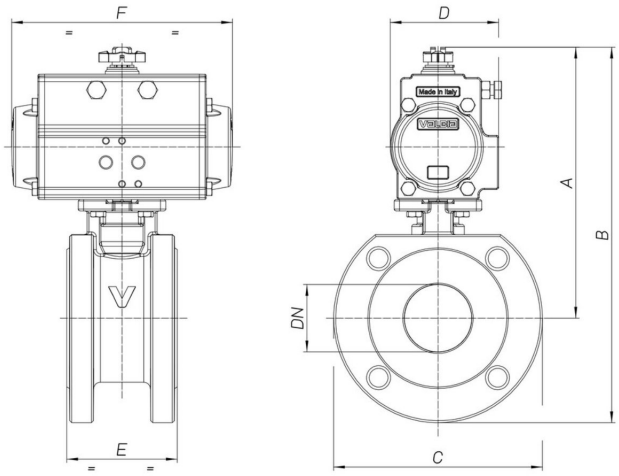

Stainless steel flanged ball valves with pneumatic rotary actuator
Series BA282

Design type	Ball valve: Shut-off valve with floating ball, full bore passage, antistatic version, Compensation hole Actuator: Piston actuator with 2 opposing pistons, elastic sealing, actuator in all details in accordance with ISO 5211 or according to NAMUR recommendations, End positions adjustable on both sides +/-5°
Connection	Flanges DN25...DN100 according to EN1092 PN16
Overall length	according to EN558-1R100
Materials Standard version	Actuator: Hard anodized aluminium, Pinion, nickel-plated steel, Piston guide POM, Seals NBR Ball valve: Body and ball stainless steel 1.4401, Seals PTFE/FKM
Function	available in double-acting or single-acting Version
Control medium	filtered and lubricated or non-lubricated compressed air
Application range	gaseous and liquid media that do not attack the materials used
Medium temperature	-20°C...+180°C
Ambient temperature	-20°C...+85°C
Operating pressure	Vacuum max. 10^{-3} Torr up to Rated pressure according to table and pressure-temperature diagram
Control pressure	5,5-8 bar, Adaptation to lower pilot pressures available on request
Mounting type	Installation in rigid piping system
Mounting position	any
Approvals	Ball valve: ATEX EX II 2G Ex h IIC T6...T1 Gb / II 2D Ex h IIIC T85°C...T450°C Db Actuator: ATEX II 2G/D c T6
Accessories	assembled manual, pneumatic or electric control valve electrical end position feedback, Positioner in I/P or P/P Version Adjustment of the switching speed
Ordering note	When ordering, please also specify control pressure, operating medium, operating pressure and operating temperature.
Application note	The pressure and temperature specifications are maximum values for normal conditions, for lubricating or non-degreasing media. Degreasing media in particular reduce the specified values and increase the required torque. For these special cases, we recommend prior consultation. When selecting the valve, the lowest control pressure occurring in the system must be taken as the basis.
