

ball valves made of steel with pneumatic actuator, socket weld ends series BAC5-...-CITV

design	ball valve: two way ball valve with floating ball, full bore, compensation hole actuator: piston actuator with 2 counteracting pistons, elastic sealing, actuator complying with ISO 5211 or rather to NAMUR-references, end position +/-5° adjustable on both sides
function	available in double acting or single acting design
connection	socket weld ends DN10 to DN100 according to DIN 3239
materials	ball valve: body steel, ball stainless steel AISI 304, ball seal PTFE, stem seal PTFE/FKM
standard construction	actuator: hard-anodised aluminum, pinion nickel-plated steel, piston guide POM, seals NBR
application	gaseous and liquid fluids which do not affect the used materials
medium temperature	-20°C...+160°C
ambient temperature	-20°C...+85°C
operating pressure	0bar to operating pressure according to the table and pressure-temperature diagram, suitable for rough vacuum
control medium	filtered and lubricated or non lubricated compressed air
control pressure	5,5-8 bar, adaptation for lower control pressures on request
type of fixing	installed into rigid pipework
mounting position	any
special version	ball valve: ATEX EX II 2G Ex h IIC T6...T1 Gb / II 2D Ex h IIIC T85°C...T450°C Db, actuator: ATEX II 2G Ex h IIC T6...T3 Gb / II 2D Ex h IIIC T85°C...T200°C Db pinion made of stainless steel, ambient temperatures of -40°C...+85°C, respectively -20°C...+150°C
accessories	mounted manual, pneumatic or electric control valve electric end position signal, I/P or P/P positioner control of moving speed
order information	in case of order please specify control pressure, operating medium and operating pressure
direction for use	pressure and temperature values are maximum values for lubricating or not degreasing mediums. in particular degreasing media reduce the indicated values and increase the necessary torque. In border lines we recommend a previous consultation. when selecting the armature, the lowest control pressure in the equipment is taken as the basis

dimensions

ball valves with double acting pneumatic actuator

nominal diameter DN [mm]	max. operating pressure [bar] to 85°C	B	C	D	E	F	G	type of actuator	kv value [m ³ /h]	weight [app. kg]	type

100	16	436	341	123	217	275	190	PAD100	1390	29,7	BAC5-012-CITV-D0

*with add-on B the ball valves will be fitted with actuator PAD052. when using limit switch boxes and NAMUR-control valves use B-types.

ball valves with single acting pneumatic actuator
