

Stainless steel flanged ball valves with electric actuator

Series BA051

Design type	Flanged ball valve with Electric geared motor, additional manual override, Actuator heater and Torque monitoring, Face-to-face length according to EN558-1 R27
Connection	Flanges DN15...DN150 according to EN1092-1
Materials Standard version	Actuator: Polymer housing PA6 or rather PA66 Ball valve: Body and ball stainless steel 1.4408, Ball seal PTFE, Spindle seal PTFE/FKM
Application range	Fluids and gases of group 1 and 2 in accordance with PED 2014/68/EU that do not attack the materials used
Medium temperature	-20...+160°C
Ambient temperature	-20...+55°C
Operating pressure	Vacuum max. 10^{-3} Torr up to Operating pressure according to table and pressure-temperature diagram
Mounting type	Installation in rigid piping system
Mounting position	any, except hanging downward

Electrical data:

Voltage type	AC and DC voltage
Standard voltage	see table "Electrical data"
Permissible voltage fluctuation	± 10%
Electrical Connection	via cable gland PG11
End position shut-off	via integrated limit switches
Duty cycle	see table "Electrical data", however max. 100 switching cycles per day
Degree of protection	VB015 IP65 or rather all other sizes IP67 according to EN 60529 with properly installed cable entry (protection against dust ingress and splashing water)
Approvals	Ball valve ATEX, FireSafe, TA-Luft
Special version	oil-, grease- and silicone-free for oxygen, Battery pack for safety position, Positioner
Ordering note	When ordering, please also specify the operating medium, operating pressure and operating temperature.
Application note	The pressure and temperature specifications are maximum values for normal conditions, for lubricating or non-degreasing media. Degreasing media in particular reduce the specified values and increase the required torque. For these special cases, we recommend prior consultation.

VB350-L	24V/50-60Hz/24VDC	AC 1,895 / DC 1,65	350	75%	50
VB350-H	100-240V/50-60Hz	0,75-0,4	350	75%	50

Electrical connection example VB015

Position	Description	Note
H	Heater	Standard
L	Torque limiter	Standard
MC	End position feedback signals CLOSED	Standard max. 1A/250VAC-1A/30VDC
MO	End position feedback signals ON	Standard max. 1A/250VAC-1A/30VDC
MCL	Actuator CLOSED	
MOP	Actuator OPEN	

The diagram illustrates a control system for a motor (M1). The power supply consists of three lines: PE (Protective Earth), L (+) (Line), and N (-) (Neutral). A fuse (F1) is connected to the L (+) line. The circuit is divided into three main sections: X:F (Fuses), X:G (Grounding), and X:R (Resistor). The X:F section contains a circuit breaker (C1) and a fuse (F1). The X:G section contains a grounding point (GROUND) and three switches (S1, S2, S3) controlling a resistor (R1). The X:R section contains a resistor (R1) and a motor (M1). The motor (M1) is connected to the L (+) line through a switch (S3) and to the N (-) line through a switch (S1). The resistor (R1) is connected to the L (+) line through a switch (S2) and to the N (-) line through a switch (S1).

2-Point control or 3-point control by changing the electrical connection VB030 - VB350
